RPM Technology Selects E.V. Roberts as Aerospace Distributor

Carson, California; July 30, 2010 – RPM Technology, LLC, a technological leader in specialized aerospace solvents and cleaning products, has selected E.V. Roberts as an authorized distributor.

RPM's advanced products safely remove some of the industry's most tenacious sealants, adhesives and silicones. Their products include leading brands such as: PolyGone®, Digesil®, Di-Aqua®, eOx®, Poly-Wipes® and Petrol-Seal®.

"We are excited about offering our customers technologies from RPM," said Lyndon Smith, President of E.V. Roberts. "Their brands strongly complement key products within our overall portfolio, including polysulfide sealants and silicones – enabling us to provide a full solution to our aerospace customers."

E.V. Roberts is an award-winning leader in the distribution of engineered materials. They are a preferred supplier to leading OEMs, suppliers, MROs and government agencies in the aerospace, electronics and specialty manufacturing sectors.

"We are glad RPM products are now part of E.V. Roberts' comprehensive product offering," said Jim Esposito, Principal of RPM Technology, LLC., "their advanced materials portfolio and extensive aerospace application experience complements our product technologies."

E.V. Roberts was founded in 1938 and distributes, custom formulates and packages engineered materials for aerospace, electronics and specialty industrial applications. With headquarters in Carson, California, they maintain ISO9001:2008, AS9100 (Rev. B), AS9120, as well as military and OEM-based quality certifications.

Founded in 2003, RPM Technology is headquartered in Reno, Nevada. They provide new and innovative chemistry to aviation, electronics, medical, and numerous other industrial markets.
