

QUALITY CERTIFICATIONS

E.V. Roberts, Resin Formulators and Chemical Packaging Solutions are fully qualified to design, manufacture and distribute products to a variety of industries. We are independently certified by PRI Registrar to three rigorous international quality standards: ISO9001:2008, AS9100 (Rev. C) and AS9120 (Rev. A).

To verify compliance with the requirements of these certifications, we engage in routine on-site examinations and audits of our processes. These certifications, along with stringent self-examination practices, help ensure that we provide the highest quality products and services to our customers.

ISO9001:2008

This stringent international quality management standard applies to any manufacturing or service industry. It focuses primarily on the order fulfillment process - establishing specific requirements for quality, service and management procedures. Due to its broad scope, it is the most widely-recognized standard, with global acceptance in over 150 countries. E.V. Roberts is the first aerospace materials distributor to achieve this newly-revised quality standard.

AS9100 Rev. C

This specialized aerospace standard is recognized by all aerospace manufacturers in North America, Europe and Asia. It encompasses all requirements from ISO9001:2000 and adds 80 supplemental requirements to reflect exacting aerospace standards. This standard is comprehensive - addressing the procedural aspects of our quality management system as well as system effectiveness. This certification represents the highest operational standards within the aerospace industry.

AS9120 Rev. A

The AS9120 standard defines strict traceability and material management criteria for distributors to the aerospace industry. Adding nearly 100 aerospace-specific requirements to ISO9001:2000, AS9120 is a comprehensive quality system - focused on areas directly impacting product safety and reliability including: batch / lot splitting, airworthiness certification, control of records, traceability and evidence of conformance. Certification to this standard represents a commitment to aerospace customers that our quality management system for order fulfillment meets or exceeds world-class benchmarks.

In addition to these quality standards, E.V. Roberts also fully complies with:

- *Boeing Material Specifications: BMS 5-42, BMS 5-90, BMS 5-101, BMS 5-129 and BMS 5-154*
- *MIL-STD-45662A: Calibration System Requirements*
- *MIL-I-45208A: Inspection System Requirements*
- *International Traffic in Arms Regulation (ITAR) requirements*
